

ZÜND XL-2500

contour cutter

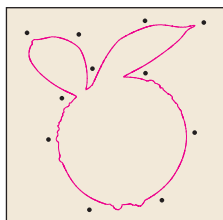

artwork guide sheet

cut your graphics to shape

bring your graphics to life by combining our new UV flat-bed printing technology with our state of the art cutter and router, 2200mm wide able to cut and route a variety of media with ease and precision - e.g foamex, foamboard, card, KAPA, perspex (PETG), paper, vinyl, correx and many more.

artwork guidelines

- 1) Create artwork at actual size with 6mm diameter black registration dots approx 10mm away from the cutter guide
- 2) It is helpful to put the registration dots on a separate layer called "Register"
- 3) Cutter guide must be a vector file with the desired cut on a separate layer called "Cut"
- 4) Please allow 3mm bleed outside the cutter guide
- 5) Finally supply an .AI or .EPS file and we'll do the rest - easy!

prices vary immensely depending upon media type - whether cutting or routing and quantity - please call for quotation

If we can be of further assistance please call and we will be happy to help with any questions
